

# NMSU Engineering Dean's Council

## COUNCIL MEMBERS

What is the involvement of your current company with NMSU College of Engineering?

What opportunities do you see for expanding that involvement, perhaps with research contracts with individual faculty?

What are the barriers to growing those opportunities with NMSU?

Can you give examples of how other universities have been more successful in public/private partnerships? Can you identify characteristics of that successful relationship that NMSU could emulate?

# NMSU Engineering Dean's Council

## VISON

From your perspective, what is the most important goal for the College of Engineering to focus on in the next five years?

How can you see yourself, as an individual, and your company supporting that goal?
